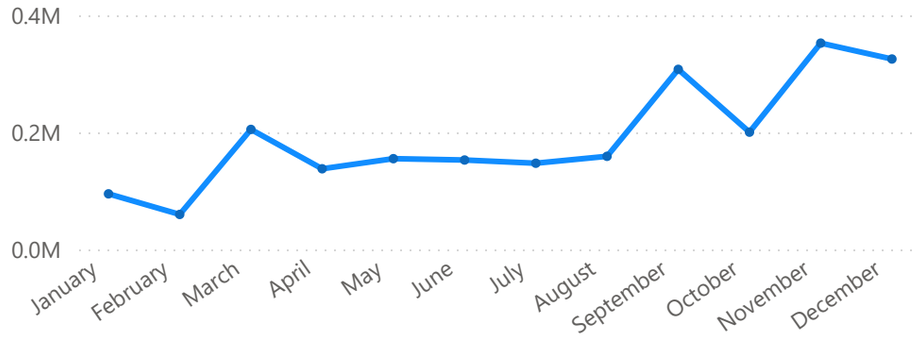
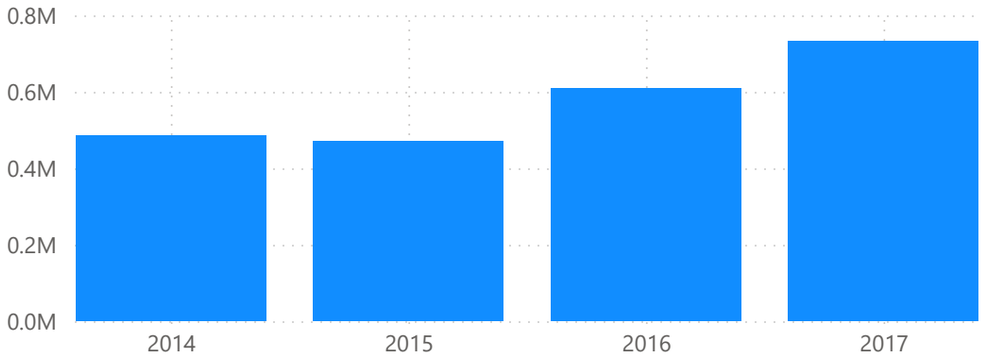
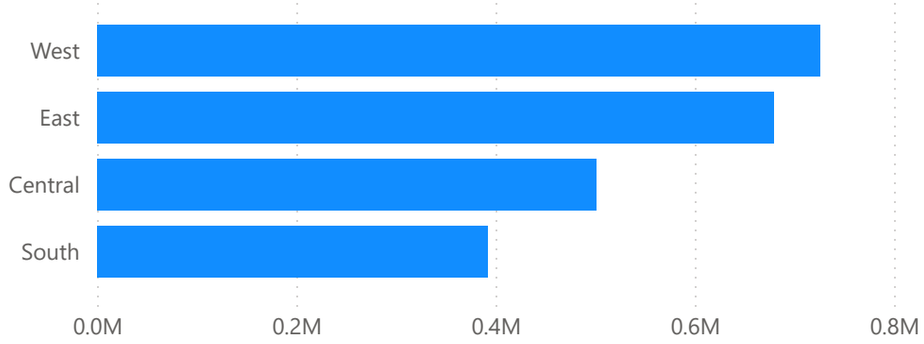
Monthly Revenue Trend



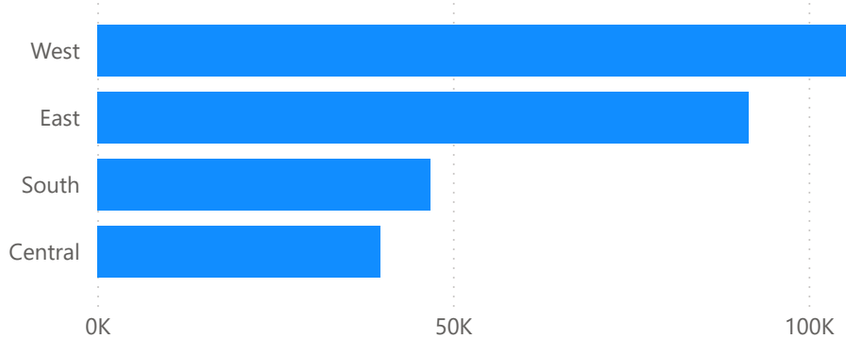
Revenue by Year



Revenue by Region



Profit by Region



Key Insight

Revenue grew 51% over four years, from $484K in 2014 to $733K in 2017. Growth accelerated in Q4 each year, suggesting a consistent seasonal demand.

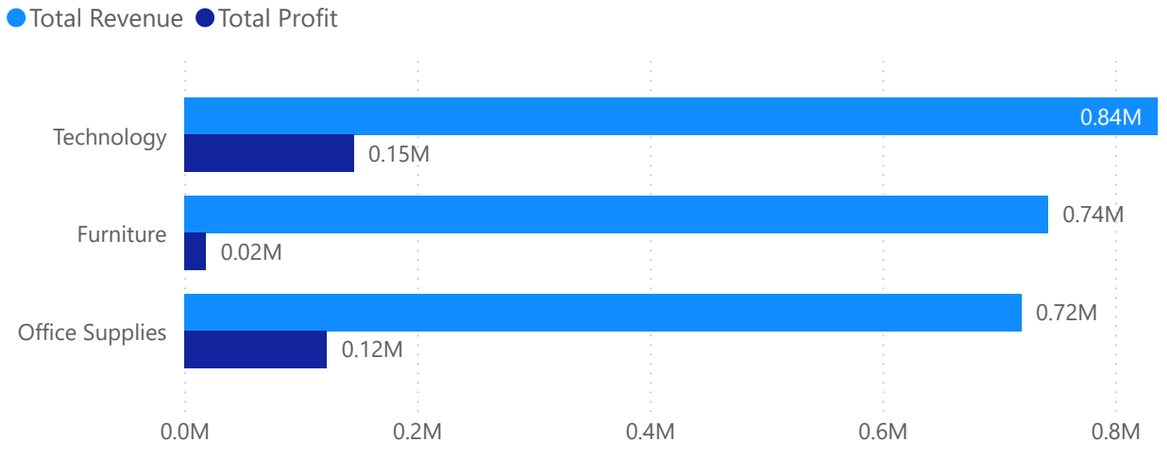
Business Action

Prioritise inventory planning and marketing spend in Q3 to capture peak season demand (Aug–Nov). The West region leads both revenue and profit, it should anchor any regional growth strategy.

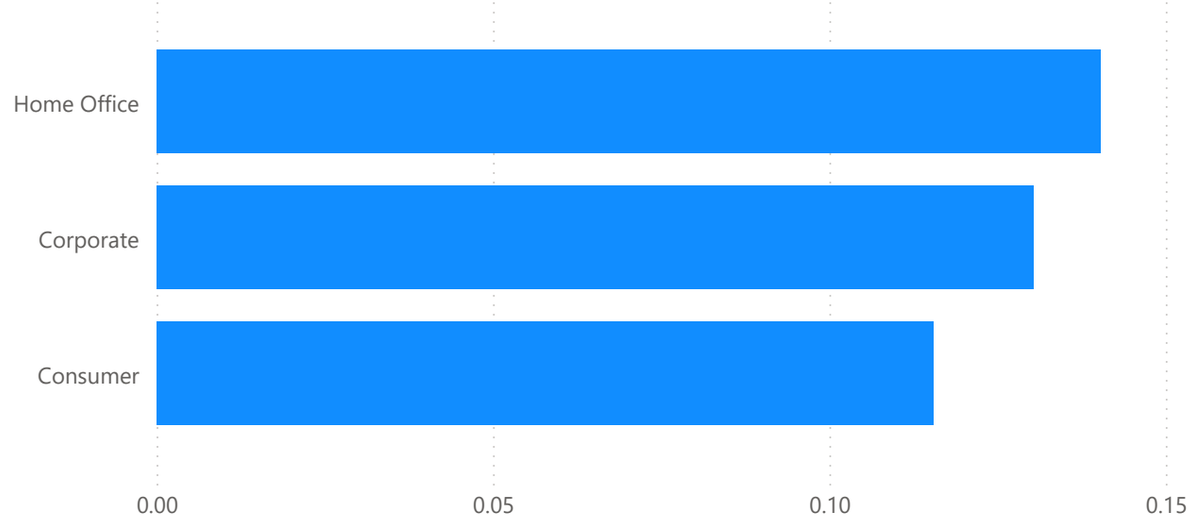
Category & Product Analysis

Category: Furniture | Office Supplies | Technology

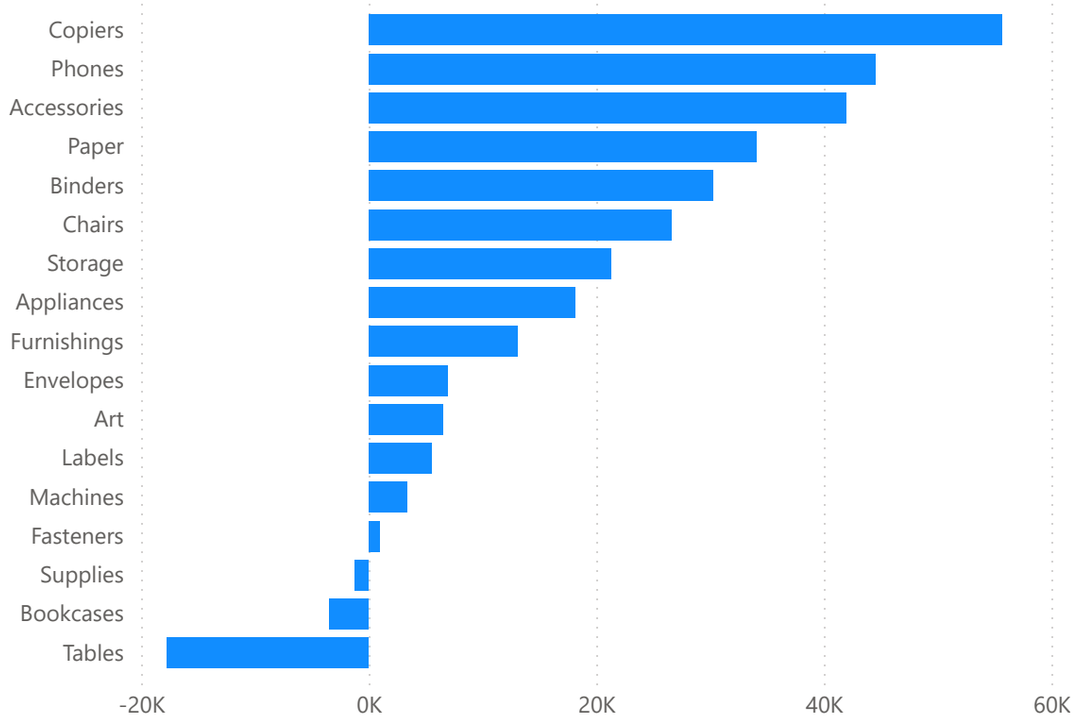
Revenue vs Profit by Category



Profit Margin by segment



Profit by Sub-Category



Key Insight
Furniture generates $742K in revenue but only $18K in profit (2.4% margin). Tables alone lose ~$17K, making it the single most profit-damaging sub-category.

Business Action
Audit Table pricing and discount rates immediately. Redirect promotional spend toward Copiers and Accessories, the highest-profit sub-categories, to improve overall margin.

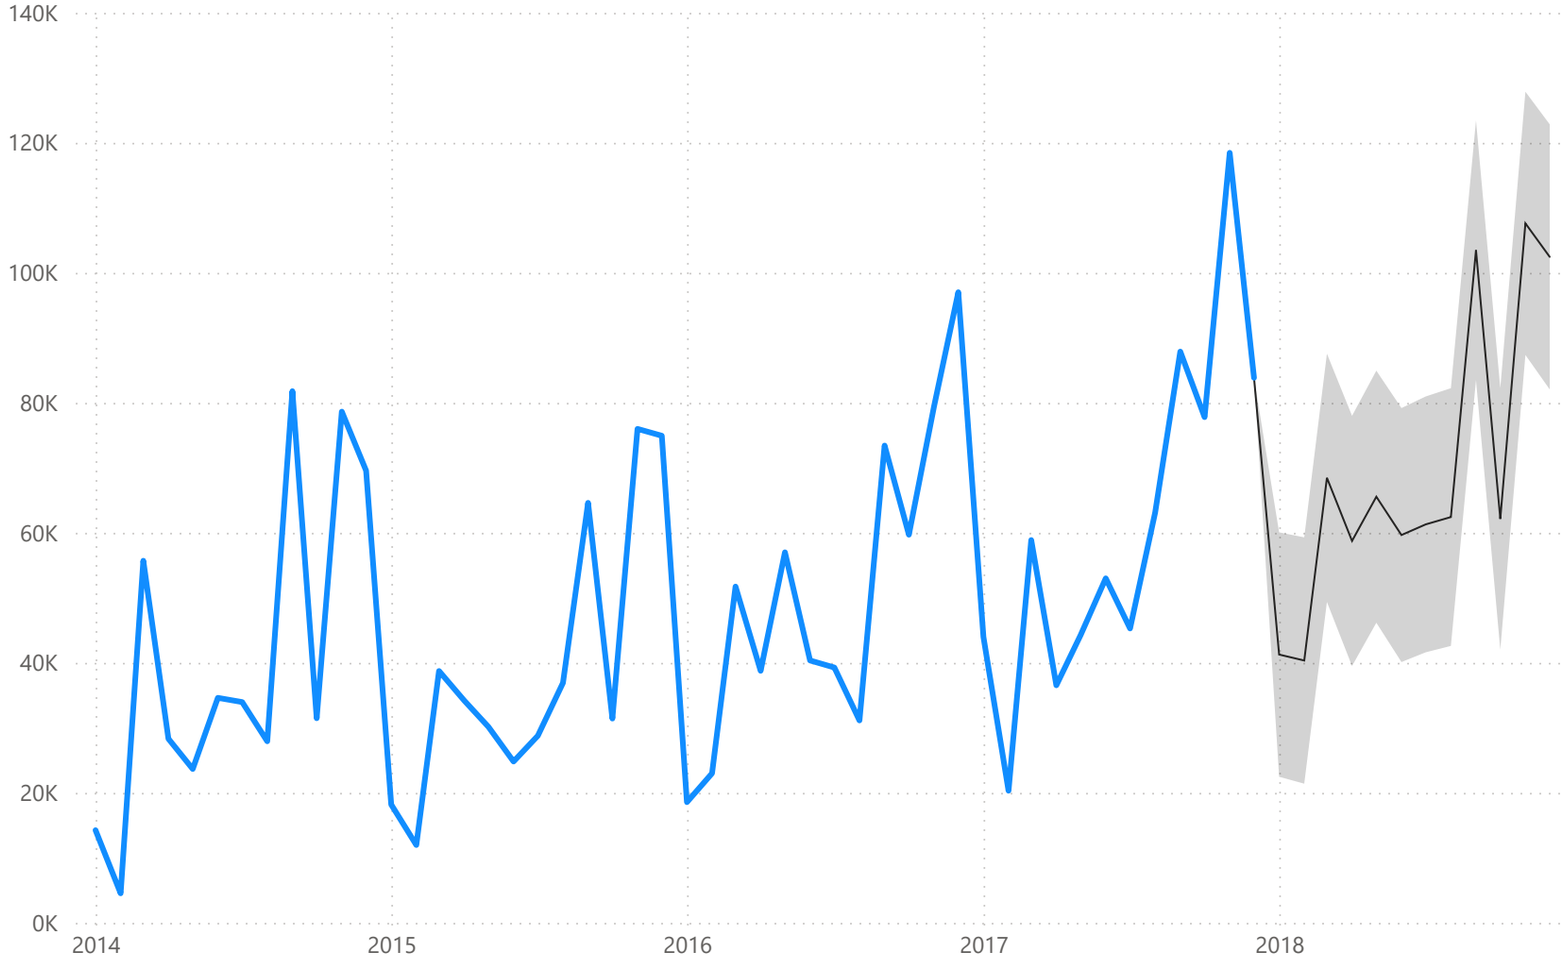
Revenue Trend & Forecast



Key Insight:
Revenue is forecast to exceed $100K/month by Q4 2018, extending four consecutive years of ~20% annual growth. Seasonal peaks suggest Q4 will again be the highest-demand period.

Business Action:
Begin capacity and staffing planning now to meet projected Q4 2018 demand. Investment in Technology products and the West region offers the strongest return, based on consistent margin and volume performance.
